11th Scientific Meeting of the Malaysian Society of Transplantation

17th - 19th April 2008 Pangkor Island Beach Resort

MINISTRY OF HEALTH
MALAYSIA

**Transplantation In Malaysia:
An Ever Expanding Horizon**

MESSAGE FROM THE ORGANIZING CHAIRMAN

On behalf of the organizing committee, it is indeed my pleasure to welcome all of you to our annual 11th Scientific Meeting of the Malaysian Society of Transplantation to be held in this charming paradise island of Pangkor.

It is interesting to note this year's theme : Transplantation in Malaysia – An Ever Expanding Horizon. The expansion of the transplant programmes includes the double heart transplantation and the first heart-lung transplantation. As a whole, our transplant activities will continue to expand with much publicity has been given by the media to promote organ donation awareness among the public. We hope that this forum will provide us the continuous enthusiasm and updates on the latest trend in transplantation.

The committee has prepared a very interesting scientific programme which consist of topics and talks by eminent faculty members from Australia , Singapore and Malaysia. The talks are designed to provide information and skills for doctors and paramedical staff to further expand their knowledge in managing transplant patients.

It is the hope of the organizing committee that members of the society will not only have a fruitful discussion but also enjoy the serenity and comfort of the beautiful island of Pangkor.

I wish to thank the Ministry of Health of Malaysia, President and committee members of MST, all sponsors especially Novartis, Roche, Janssen-Cilag and other pharmaceutical companies who have given us their full support to make this event possible. Not forgetting my organizing committee, who have work tirelessly to ensure this upcoming meeting will be a success.

Finally, I am truly delighted to welcome all of you again and thank you for taking time off to attend this meeting. We seriously hope that all of us will be able to expand our knowledge in this unique field of transplantation.

Dr Mohamed Ezani Md Taib

Organizing Chairman, 11th MST Scientific Meeting
